AGENDA:

Review of the water rate study to determine water rate increase.

Members of the board reviewed the water rate study and the recommendations for the fixed charge of the readiness to serve fee based on the current meter size rates removing the consumption allowance. Requested time to verify wording, meter size, and application to each meter on an account. Charge would apply to all accounts regardless of account status.

Next recommendation was to adjust water rates to remove tiers for increased usage. Water rates would be a fixed amount for inside users and outside users with no discount to high volume users. The Village of Lordstown does not receive tiered purchase rates from suppliers.

Board will resume review after they are able to see how these changes improve the annual revenue in that water rate study before they adjust the water rate.
